FibaTape Perfect Finish Performance Features

- **Thinner profile** – Plain weave construction allows us to achieve a thinner profile for a smooth and seamless finish.
- **Increased strength** – 50% more intersection points and an increased number of fabric yarns for unparalleled durability. *In fact, strength-to-first-crack testing proves that Perfect Finish is stronger than standard fiberglass mesh*
- **Ideal for butt-end joints** – Thinner profile requires less compound for easier feathering and sanding
- **Self-adhesive** – Save time by eliminating the need for a pre-bedding coat
- **No blisters or bubbles** – An open mesh design means a smooth finish every time
