ViPer Vision Perfect Screen

NEW & IMPROVED

Better Visibility with Vision Perfect Screen

Stronger ideas for a sustainable world

ViPer – Vision Perfect Screen is the clear-cut choice for premium quality and clarity.

ViPer – Vision Perfect Screen is a fiberglass screen manufactured using an enhanced tighter weave and finer mesh woven from smaller refined yarns as compared to standard fiberglass screening. As a premium screen product, ViPer is tested using ASTM D3656 standards. One of the biggest advantages to ViPer is that the construction allows for sharp brilliant visibility through windows, doors and screened porches. Aside from maximized view, ViPer provides better airflow, more light and greater insect protection.

Window above shows standard screen on the right versus ViPer - Vision Perfect screen on the left.

Features and benefits of ViPer Vision Perfect Screen include:

- 20% thinner yarn than the industry standard provides a screen that offers clear, increased visibility as well as greater light transmission and airflow
- Smaller opening than the industry standard provides better protection from insects and small particles
- Charcoal fiberglass mesh is dent-resistant and flame retardant for increased protection
- Smaller, refined yarns present a less obtrusive appearance which enhances curb appeal
- New York Wire screen is leading the industry by offering a complete line of ortho-phthalate free screen

ViPer Vision Perfect screen is available in multiple widths in 100' and 600' contractor roll lengths.

ViPer Screen FAQ's

Why upgrade to ViPer?

For a very small investment (per window or door), you can have a screen that is much easier to see through while providing better curb appeal to your windows and doors.

How is ViPer less visible than standard fiberglass??

ViPer is designed with a thinner fiberglass yarn to allow you to be able to see through it more clearly, with a less obstructed view. The thinner yarn combined with a tighter weave provide the illusion of a virtually invisible screen.

Does thinner yarn mean that the screen will tear easily?

No, not at all. ViPer was specially engineered to maintain optimal strength while allowing for a better outward view.

What is new and improved about this product?

NYW Screen is now ortho-phthalate free and does not contain any substances covered under California Prop 65. We have maintained the same great aesthetics, properties and processibility that our screen has always had. We have also now achieved GREENGUARD Gold certification on this product, which certifies that the product has low chemical emissions.
