

NEW YORK WIRE

PET RESISTANT SCREEN

NEW & IMPROVED

## Get Your Paws on America's Toughest Screen

Resists tears and damage caused by pets

Stronger ideas for a sustainable world

# Nothing else compares to New York Wire's ultra-strong Pet Resistant Screen in strength, durability and safety.

Designed to resist damage, Pet Resistant Screen is much heavier than traditional screen and can be used in any door or window. Pet Resistant screen is a smart solution for those who repeatedly have to replace screens.

Our Pet Resistant Screen is the only one on the market whose coating makes it flame resistant by passing the ASTM requirements D3656 and D6413 as well as ISO11925-2. Visit [www.newyorkwire.com](http://www.newyorkwire.com) to see the flame tests completed using ISO11925-2 testing standards.

## Features and benefits of Pet Resistant Screen include:

- Heavy duty screen prevents tears and damage from household pets
- Ideal for areas where pets or children push against the screening
- Durable, yet still allows for excellent outward visibility and airflow
- New York Wire screen is leading the industry by offering a complete line of ortho-phthalate free screen

Pet Resistant Screen is available in DIY pre-cut and contractor rolls. Each pre-cut roll comes with simple step-by-step instructions for easy installation. New York Wire .125" spline is recommended for the best fit in a standard frame.

*Pet Resistant is also available in a full kit which includes the spline and installation tool.*

## Pet Resistant Screen FAQ's

### What makes Pet screen more durable than standard insect screen?

Pet screen is made from polyester yarn which has more stretch than fiberglass yarn. The polyester yarn is also thicker making it more tear resistant.

### Will this prevent my pet or child from running through the screen?

No. This will withstand light pressure and will resist tears.

### Why is NYW screen flame resistant and the competition's screen is not?

NYW screen was tested per the ASTM standard test for flame resistance. Our coating is specially formulated to contain flame resistant properties.

### What are ASTM tests D3656 and D6413?\*

These two tests measure the flame time, flame height and char length of the screen when exposed to a flame source and after removal of the flame source.

### What is new and improved about this product?

NYW Screen is now ortho-phthalate free and does not contain any substances covered under California Prop 65. We have maintained the same great aesthetics, properties and processibility that our screen has always had. We have also now achieved GREENGUARD Gold certification on this product, which certifies that the product has low chemical emissions.

**Flame Resistant**

New York Wire is the **ONLY** flame resistant Pet Screen on the market!
