Stronger ideas for a sustainable world

# WALL REPAIR FABRICS

## Self-adhesive fiberglass mesh

Looking for a new way to repair damaged walls and ceilings without the dirty, dusty, complicated mess of a complete tear-out? FibaTape® wall repair fabrics are the answer.

Part of the FibaTape family of drywall finishing solutions, Crackstop™ and Super Crackstop™ products are rugged, easy-to-install wall repair fabrics. Designed for professional drywall and paint contractors as well as DIYers, these self-adhesive fiberglass mesh products allow you to permanently repair damaged walls and ceilings. Like all FibaTape products, Crackstop and Super Crackstop offer exceptional strength, flexibility, ease-of-use and cost savings.

Whether it's repairing cracks around windows and doors, restoring damaged plaster, or refinishing paneling and cinder block walls, Crackstop and Super Crackstop offer a simple 3-step solution.

- 1) Apply the self-adhesive mesh to the area being repaired. It stays in place, making it easy to work overhead and in tight spaces.
- 2) Apply a thin skim coat – just enough to hide the mesh. After drying, additional coats may be necessary, depending on the type of repair.
- 3) Lightly sand for a perfect finish.

### Crackstop™

For small to mid-size crack repair.

- 6" width for cracks that branch in multiple directions
- For recurring cracks in plaster, stucco and drywall
- Available in 20' DIY box and 75' shrink-wrapped contractor size

### Super Crackstop™

For full or complete wall and ceiling resurfacing.

- Self-adhesive is especially useful for ceiling repairs
- 36" width for reinforcing plaster walls against recurring spider web or alligator cracking
- Saves labor involved in tearing out old plaster, and inserting new extension jambs on doors and windows
- Compatible with most plaster, drywall, spackling and stucco materials
- Requires only thin finish coat of drywall or plaster compound
- Also reinforces cinder block walls and paneling (requires additional preparation and finishing)
- Available in single roll covering 225 sq. ft. (36" x 75') and double roll covering 450 sq. ft. (36" x 150')
