

NEW YORK WIRE
CLEAR ADVANTAGE™ SCREEN

NEW & IMPROVED

For Better Visibility, the Choice is Clear

Stronger ideas for a sustainable world

A screening product that offers better visibility without compromising durability

New York Wire Clear Advantage™ is the clear choice for high visibility screen. Clear Advantage features low diameter fiberglass yarns which, when combined with more yarns per inch, provides the optical illusion that the screen is invisible. As a premium screen product, Clear Advantage is tested using ASTM D3656 standards.

Features and benefits of Clear Advantage Screen include:

- Allows up to 50% more natural light and dramatically improves airflow versus standard screening
- Practically undetectable from the exterior which enhances the curb appeal of your home or office
- Finer mesh and weave provides greater insect protection than standard screen
- New York Wire screen is leading the industry by offering a complete line of ortho-phthalate free screen

Clear Advantage screen is available in DIY pre-cut and 100' and 600' contractor rolls. Each pre-cut roll comes with simple step-by-step instructions for easy installation. New York Wire .140" spline is recommended for the best fit in a standard frame.

Clear Advantage is also available in a full kit which includes the spline and installation tool.

Window above shows standard screen on the left versus Clear Advantage screen on the right.

Clear Advantage Screen FAQ's

Does Clear Advantage meet industry standards?

Technically there are no industry standards for such a fine screen product (.008"). Clear Advantage exceeds minimum industry standards in both tensile strengths and bursting strength.

What other differences exist between Clear Advantage and standard screen?

In Clear Advantage, the fiberglass strand is a finer gauge which helps make the average weight of the product 30% lower than the industry standard.

How does the comparable Gortex® product differ from Clear Advantage?

Gortex is a much finer gauge with a very low weight, which means it is prone to tearing easily. Also, the weight of the Gortex product makes it challenging to roll into the screen frame, increasing scrap costs.

How is Clear Advantage less visible than standard fiberglass screen?

Our use of color and unique design allows for increased light absorption and less light reflection creating lower glare and making the product less visible to the naked eye.

What is new and improved about this product?

NYW Screen is now ortho-phthalate free and does not contain any substances covered under California Prop 65. We have maintained the same great aesthetics, properties and processibility that our screen has always had. We have also now achieved GREENGUARD Gold certification on this product, which certifies that the product has low chemical emissions.
