

NEW YORK WIRE

SMALL INSECT SCREEN

NEW & IMPROVED

Better Protection from Tiny Insects

Stronger ideas for a sustainable world

Enjoy the outdoors with protection from small insects

New York Wire Small Insect Screen is ideal for protection against no-see-ums, gnats, sand flies and other tiny irritating insects. Small Insect Screen features a thicker yarn and tighter weave construction which form a barrier to keep out smaller insects, without obstructing airflow and offering a more enjoyable outdoor environment. As a premium screen product, Small Insect Screen is tested using ASTM 3656 standards.

Features and benefits of Small Insect Screen include:

- Tighter weave provides greater insect protection than standard screen
- Ideal for low marshy, coastal and wooded areas
- Perfect for use in gazebos, porches and pool enclosures
- Easy to install
- New York Wire screen is leading the industry by offering a complete line of ortho-phthalate free screen

Small Insect screen is available in DIY pre-cut and 100' contractor rolls. Each pre-cut roll comes with simple step-by-step instructions for easy installation. New York Wire .140" spline is recommended for the best fit in a standard frame.

Small Insect Screen FAQ's

You used to carry a screen called "No-See-Um," do you still carry it?

Yes. We replaced "No-See-Um" screen with "Small Insect." We made this name change because Small Insect screen not only blocks no-see-ums from entering a home or patio, but other tiny, hard to see insects as well.

What is a No-See-Um?

A no-see-um is an extremely tiny insect that typically inhabits low, marshy coastal areas such as Florida, as well as mountainous and wooded areas. They often bite leaving red swollen marks on humans.

How does Small Insect screen stop these tiny insects from moving through openings?

Small Insect screen was engineered with a thicker yarn and tighter weave than most fiberglass screens to prevent most small insects from entering.

What is new and improved about this product?

NYW Screen is now ortho-phthalate free and does not contain any substances covered under California Prop 65. We have maintained the same great aesthetics, properties and processibility that our screen has always had. We have also now achieved GREENGUARD Gold certification on this product, which certifies that the product has low chemical emissions.
